Pipeline Summary

Total Findings Processed	150
Remediated Successfully	48
Failed Remediation	51
Requires Human Review	46
Discarded / Blocked	5
Success Rate	32.0%
Total Duration	32464.4s

LLM Usage (Aggregate)

Total LLM Calls	1100
Total Errors	104

Total LLM Duration	9281.9s
Prompt Tokens	3,392,810
Completion Tokens	279,962
Total Tokens	3,672,772
Estimated Cost (USD)	$0.5562

LLM Usage by Agent

Agent	Calls	Errors	Duration (s)	Prompt Tok	Compl Tok	Total Tok	Cost (USD)

Review Verdict

Approved	✓
Optimal	✓
Security Score	10/10
Feedback	The plan is sound and directly addresses the previous review's concerns by including 'sshd -t' to validate configuration syntax
Concerns	The command 'sed -i '/^\s*LogLevel/d' /etc/ssh/sshd_config.d/*.conf' may fail if no .conf files exist in that directory, depending

QA Result

Safe	✓
Verdict	The plan correctly addresses the requirement to set the SSH LogLevel to VERBOSE. Importantly, it includes a syntax check
Side Effects	Increased log file size due to more verbose logging.
Regression	✗
Recommendation	Approve
