

OpenSCAP Triage Report

Target: 192.168.1.235 | Generated: 2026-02-17 22:58:02

Scan Statistics

Total Rules Scanned	0
Rules Passed	0
Rules Failed / Errors	0

Triage Summary

Total Findings Triage	23
Safe to Remediate	2
Requires Human Review	13
Too Dangerous / Blocked	8

Safe to Remediate (2)

ID	Rule	Title	Severity	Result	Host	OS	Risk	Reason	Impact
openscap_013	xccdf_org.ssgproject.content_rule_accounts_password_pam_minlen	xccdf_org.ssgproject.content_rule_accounts_password_pam_minlen	Medium	FAIL	localhost	localhost.localdomain	LOW	Password length is a low-risk change that is unlikely to lock out access.	authentication/authorization affected
openscap_019	xccdf_org.ssgproject.content_rule_postfix_prevent_unrestricted_relay	xccdf_org.ssgproject.content_rule_postfix_prevent_unrestricted_relay	Medium	FAIL	localhost	localhost.localdomain	LOW	This rule is related to Postfix configuration and does not affect authentication, authorization, or critical system components.	networking affected

Requires Human Review (13)

ID	Rule	Title	Severity	Result	Host	OS	Risk	Reason	Impact
openscap_004	xccdf_org.ssgproject.content_rule_harden_sshd_macros_openssh_conf_crypto_policy	xccdf_org.ssgproject.content_rule_harden_sshd_macros_openssh_conf_crypto_policy	Medium	FAIL	localhost	localhost.localdomain	MEDIUM	SSH configuration changes could potentially lock out access if not reviewed carefully.	authentication/authorization affected; SSH configuration changes; potential access lockout
openscap_005	xccdf_org.ssgproject.content_rule_harden_sshd_macros_opensshserver_conf_crypto_policy	xccdf_org.ssgproject.content_rule_harden_sshd_macros_opensshserver_conf_crypto_policy	Medium	FAIL	localhost	localhost.localdomain	MEDIUM	SSH configuration changes could potentially lock out access if not reviewed carefully.	authentication/authorization affected; SSH access; lockout risk
openscap_006	xccdf_org.ssgproject.content_rule_installed_OS_is_vendor_supported	xccdf_org.ssgproject.content_rule_installed_OS_is_vendor_supported	Medium	FAIL	localhost	localhost.localdomain	MEDIUM	The finding is related to the installed OS being vendor-supported, which may involve complex system configuration and potential risks to system stability.	system stability; vendor support
openscap_012	xccdf_org.ssgproject.content_rule_enable_authselect	xccdf_org.ssgproject.content_rule_enable_authselect	Medium	FAIL	localhost	localhost.localdomain	MEDIUM	Authselect is related to authentication, which could potentially lock out access if not configured correctly.	authentication/authorization affected; authentication changes; potential lockout
openscap_014	xccdf_org.ssgproject.content_rule_accounts_authorized_local_users	xccdf_org.ssgproject.content_rule_accounts_authorized_local_users	Medium	FAIL	localhost	localhost.localdomain	MEDIUM	This rule involves reviewing and remediating authorized local users, which could potentially impact access and authentication.	authentication/authorization affected; access control; authentication
openscap_015	xccdf_org.ssgproject.content_rule_grub2_admin_username	xccdf_org.ssgproject.content_rule_grub2_admin_username	Medium	FAIL	localhost	localhost.localdomain	MEDIUM	Changing the GRUB2 admin username could potentially impact system boot or access.	reboot required; authentication/authorization affected; bootloader changes; potential access impact
openscap_016	xccdf_org.ssgproject.content_rule_grub2_password	xccdf_org.ssgproject.content_rule_grub2_password	Medium	FAIL	localhost	localhost.localdomain	MEDIUM	Changing the GRUB2 password could potentially lock out access to the system.	reboot required; bootloader modification
openscap_017	xccdf_org.ssgproject.content_rule_network_configure_name_resolution	xccdf_org.ssgproject.content_rule_network_configure_name_resolution	Medium	FAIL	localhost	localhost.localdomain	MEDIUM	Name resolution configuration could potentially impact network connectivity or access to critical services.	networking affected; network connectivity; service availability
openscap_018	xccdf_org.ssgproject.content_rule_selinux_context_elevation_for_sudo	xccdf_org.ssgproject.content_rule_selinux_context_elevation_for_sudo	Medium	FAIL	localhost	localhost.localdomain	MEDIUM	This rule involves SELinux context elevation for sudo, which could potentially impact authentication and authorization. Due to the conservative policy.	authentication/authorization affected; SELinux context elevation; sudo configuration

ID	Rule	Title	Severity	Result	Host	OS	Risk	Reason	Impact
openscap_020	xccdf_org.ssgproject.content_rule_chronyd_server_directive	xccdf_org.ssgproject.content_rule_chronyd_server_directive	Medium	FAIL	localhost	localhost.localdomain	MEDIUM	The finding is related to the chronyd server directive, which could potentially impact time synchronization and system behavior. While the severity is	system behavior; time synchronization
openscap_021	xccdf_org.ssgproject.content_rule_sshd_disable_root_login	xccdf_org.ssgproject.content_rule_sshd_disable_root_login	Medium	FAIL	localhost	localhost.localdomain	MEDIUM	Disabling root login via SSH could potentially lock out access if not properly configured.	authentication/authorization affected; lockout risk; SSH configuration change
openscap_022	xccdf_org.ssgproject.content_rule_sssd_enable_certmap	xccdf_org.ssgproject.content_rule_sssd_enable_certmap	Medium	FAIL	localhost	localhost.localdomain	MEDIUM	SSSD certificate mapping configuration could impact authentication and authorization	authentication/authorization affected; authn; authz
openscap_023	xccdf_org.ssgproject.content_rule_configure_usbguard_audit_backend	xccdf_org.ssgproject.content_rule_configure_usbguard_audit_backend	Medium	FAIL	localhost	localhost.localdomain	MEDIUM	LLM triage failed; defaulting to requires_human_review. Last error: API/runtime error with meta-llama/llama-3.1-70b-instruct: OpenRouter returned empty	trriage automation failure

Too Dangerous to Remediate (8)

ID	Rule	Title	Severity	Result	Host	OS	Risk	Reason	Impact
openscap_001	xccdf_org.ssgproject.content_rule_enable_dracut_fips_module	xccdf_org.ssgproject.content_rule_enable_dracut_fips_module	Medium	FAIL	localhost	localhost.localdomain	CRITICAL	Enabling the dracut FIPS module may have unintended consequences on the system's boot process and FIPS compliance.	reboot required; filesystems affected; FIPS changes; bootloader modifications
openscap_002	xccdf_org.ssgproject.content_rule_enable_fips_mode	xccdf_org.ssgproject.content_rule_enable_fips_mode	Medium	FAIL	localhost	localhost.localdomain	CRITICAL	FIPS mode changes can have significant impact on system functionality and security	reboot required; filesystems affected; system instability; potential data loss
openscap_003	xccdf_org.ssgproject.content_rule_sysctl_crypto_fips_enabled	xccdf_org.ssgproject.content_rule_sysctl_crypto_fips_enabled	Medium	FAIL	localhost	localhost.localdomain	CRITICAL	FIPS changes can have significant impact on system functionality and security	FIPS mode; system-wide crypto configuration
openscap_007	xccdf_org.ssgproject.content_rule_partition_for_tmp	xccdf_org.ssgproject.content_rule_partition_for_tmp	Medium	FAIL	localhost	localhost.localdomain	CRITICAL	Partitioning changes can have unintended consequences on system stability and data integrity.	reboot required; filesystems affected; filesystem changes; potential data loss

ID	Rule	Title	Severity	Result	Host	OS	Risk	Reason	Impact
openscap_008	xccdf_org.ssgproject.content_rule_partition_for_var	xccdf_org.ssgproject.content_rule_partition_for_var	Medium	FAIL	localhost	localhost.localdomain	CRITICAL	Partitioning changes can have unintended consequences on system stability and data integrity.	reboot required; filesystems affected; filesystem changes; potential data loss
openscap_009	xccdf_org.ssgproject.content_rule_partition_for_var_log	xccdf_org.ssgproject.content_rule_partition_for_var_log	Medium	FAIL	localhost	localhost.localdomain	CRITICAL	Partitioning changes can be high-risk and may cause system instability or data loss.	reboot required; filesystems affected; filesystem changes; potential data loss
openscap_010	xccdf_org.ssgproject.content_rule_partition_for_var_log_audit	xccdf_org.ssgproject.content_rule_partition_for_var_log_audit	Medium	FAIL	localhost	localhost.localdomain	CRITICAL	Partitioning changes can have unintended consequences on system stability and availability.	reboot required; filesystems affected; filesystem changes; potential data loss
openscap_011	xccdf_org.ssgproject.content_rule_partition_for_var_tmp	xccdf_org.ssgproject.content_rule_partition_for_var_tmp	Medium	FAIL	localhost	localhost.localdomain	CRITICAL	Partitioning changes are considered high-risk and may impact system stability or accessibility.	reboot required; filesystems affected; filesystem changes; potential for data loss or corruption
